Authorization for this examiner's amendment was given in a telephone interview with Charles W. Griggers on 12/28/2007.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Claims 1,2,4-17,19-30,33-42 and 46 are allowable over the prior art of record. In the obviousness rejection over Kuhn et al. (Patent number 6,891,937) in view of

Art Unit: 2168

Doherty et al. (Patent Number 6,735,293) further in view of Asthana et al. (Patent Number 5,265,006) further in view of Clements ("Quality-of-Service and Market Implications of Asymmetric Standards in Telecommunications", The National Regulatory Research Institute, October 1998), these references teach quality of service standards and asymmetric quality-of-service standards and also discuss the role of regulation in production efficiency and market signals, but fail to teach that a trouble ticket is assigned to a user based upon the trouble ticket having the largest regulatory fine amongst the different geographic regions, these limitations being indicated in claim 1 as "determination of the proper trouble ticket being based upon regulatory fines that are subject to being levied against the proper trouble ticket from different regulatory agencies within the different geographic regions, wherein the proper trouble ticket is subject to cause issuance of a regulatory fine from the regulatory agency in which the regulatory fine is the largest for trouble ticket pendency" and equivalently in claims 19 and 33.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
